REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 40-49 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including means for calculating an instantaneous power supplied to the sputtering apparatus from the voltage detected by the voltage detection unit and the current detected by the current detection unit; integration means for generating an integration output obtained by integrating a difference value between the instantaneous power obtained in the calculating means and a predetermined set power; means for generating a pulse output having a pulse width corresponding to a difference between a current set value formed on the basis of the integration output and the current detected by the current detection unit; means for on/off controlling the switching unit according to the pulse output from the generating means; means for stopping the instantaneous power from being supplied to the integration means when the first switch is closed in response to the arc discharge; and means for controlling the current supplied to the sputtering apparatus by on/off controlling the switching unit using the pulse output held in the integration means when the supply of the instantaneous power to the integration means is stopped by the stopping means.

The closest prior art of record does not teach Kuriyama et al. (U.S. Pat. 6,113,760) and Boehringer (DE 39 24 398A1) fails to show the features described above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M-Th with every Friday off.
